

War & Terrorism

We provide insurance for property, aviation and marine assets against physical damage from war perils, including terrorism and foreign government confiscation. The team is proactive in tailoring products in the most challenging areas of the world.

Our specialty product lines for physical damage and business interruption include:

- Terrorism and Sabotage
- Strikes, Riot, Civil Commotion
- Malicious Damage, Insurrection, Revolution, Mutiny, Coup d'état
- War
- Civil War
- Third party liability and Employers' liability for property and business owners, arising from a terrorist event
- Aviation War

The threat of terrorism and the potentially devastating consequences of violence present new challenges for businesses worldwide. We insure international companies of all sizes, protecting their assets and balance sheets against the damage caused by terrorist acts and conflicts.

The difference between war, terrorism and political violence has become increasingly ambiguous in hostile and complex environments. In response to the diverse nature of conflicts across the world the syndicate offers a single product that provides coverage for all of these risks. This flexibility is a crucial element in The Channel Syndicate's client-focused underwriting.

Aviation War

We provide Physical Damage and excess Third party liability cover for aircraft during War, Hijacking and other associated perils including confiscation by the government of registration. We have a diverse portfolio of major passenger airlines, cargo airlines, corporate aircraft/executive jets, privately owned aircraft and aircraft used for international aid.
