

Medical device manufacturers.

Background

We understand that smaller medical device manufacturers need specialist cover at an affordable price. Having the right level of insurance cover to protect against sector specific risks is crucial to avoid the potentially devastating impact of a claim. That's why we adapted our biomedical and life sciences policy to meet the requirements of new start-ups and small organisations working on a modest budget.

Target business

Cover is available for UK businesses undertaking the manufacture of an approved medical device classified under Directive 93/42/EEC or 98/79/EC, or manufacture of laboratory equipment, instruments or apparatus.

Eligible companies must have 10 employees or fewer, with projected annual income for the forthcoming twelve months not exceeding £500,000.

For a full list of eligibility criteria, please see the quote sheet available on our website. We may be able to cater for the needs of those companies that can't comply with these criteria on our biomedical and life sciences policy.

Scope of cover

Public and products liability is a mandatory cover and can be purchased on a stand-alone basis. Alternatively the following optional covers can be added to create a package policy:

Legal liabilities:

- Public liability / products liability
