

RACECOVER

**HISCOX MGA**

Racecover

Insurance for racing yachts

Hiscox MGA is an underwriting insurance agency specialising in yachts, marinas, repair yards, boat builders and the general marine leisure industry.

We underwrite on behalf of some of the highest-rated Lloyd's syndicates and insurance companies in Europe and have had their continued support for many years.

Our underwriting team, which has over 100 years of combined insurance experience and many years of general sailing, power boating, and racing experience at a competitive level, remains at the forefront of the yacht insurance industry.

Our racecover product evolved as a response to our broker network who were finding it difficult to place coverage for the more extreme risks coupled with the ever increasing values of the 'one class' racing fleets.

Racecover – standard wording

Our standard racecover wording is designed for state of the art Open 50/60 mono-hull racing yachts. Cover is available for the single- and double-handed events including record attempts, transatlantic and round the world races. Our standard wording – written in both French and English – includes third-party liability but excludes mast, spars, sails and rigging. A policy extension is available to include the mast, spars and rigging, whilst the yacht is being used for sail training purposes, record attempts, qualifying passages and round the world races. Sails are excluded absolutely due to their limited life expectancy.

Racecover – plus wording

Our racecover plus wording is tailored to suit the needs of the serious inshore and offshore racer participating in major regattas around the world, from a production built one design, to a purpose built one-off mono-hull. Yachts such as the hi-tech TP52s suit this programme with the European circuit of inshore round the cans racing. Racecover plus includes loss or damage to the mast, spars, sails and rigging whilst not racing and can be extended for race events.

Cargo

We are able to provide full cargo coverage either by road, rail, sea or air for the vessel, masts, containers of equipment and support vessels.
