

EMBEDDED CYBER COVER

Cyber Risk solution for SMEs embedded in R&Q CRS commercial combined and package products.

While cyber risks are recognised as a major risk for all businesses irrespective of size, insurance providers have tended to focus on solutions for larger corporates. But cyber risk has the potential to cause significant financial losses and business interruptions to SMEs.

By incorporating cyber cover in its Commercial Combined and Package products, R&Q is offering an appropriate level of cover for SMEs at an affordable price, through its partners in the independent broker community. Cover includes first and third party liability expenses caused by a data breach and crime. The main components of cover are:

Cyber liability

Damages and defence costs for claims made against the insured.

Data breach expense

Costs and expenses to respond to a failure to meet data privacy obligations.

Computer system damage, data, extra cost and business income

Costs and expenses arising from a cyber event

Cyber crime

Financial loss following fraudulent modification of data in the insureds computer system.

WHY CHOOSE R&Q?

- We support the independent intermediary
- R&Q is independently owned – we are not a potential competitor for our partner brokers
- Knowledgeable and experienced underwriting team based in the London, Birmingham, Manchester and Bournemouth
- All our quotations are 100% exclusive
