

International Direct & Facultative Property

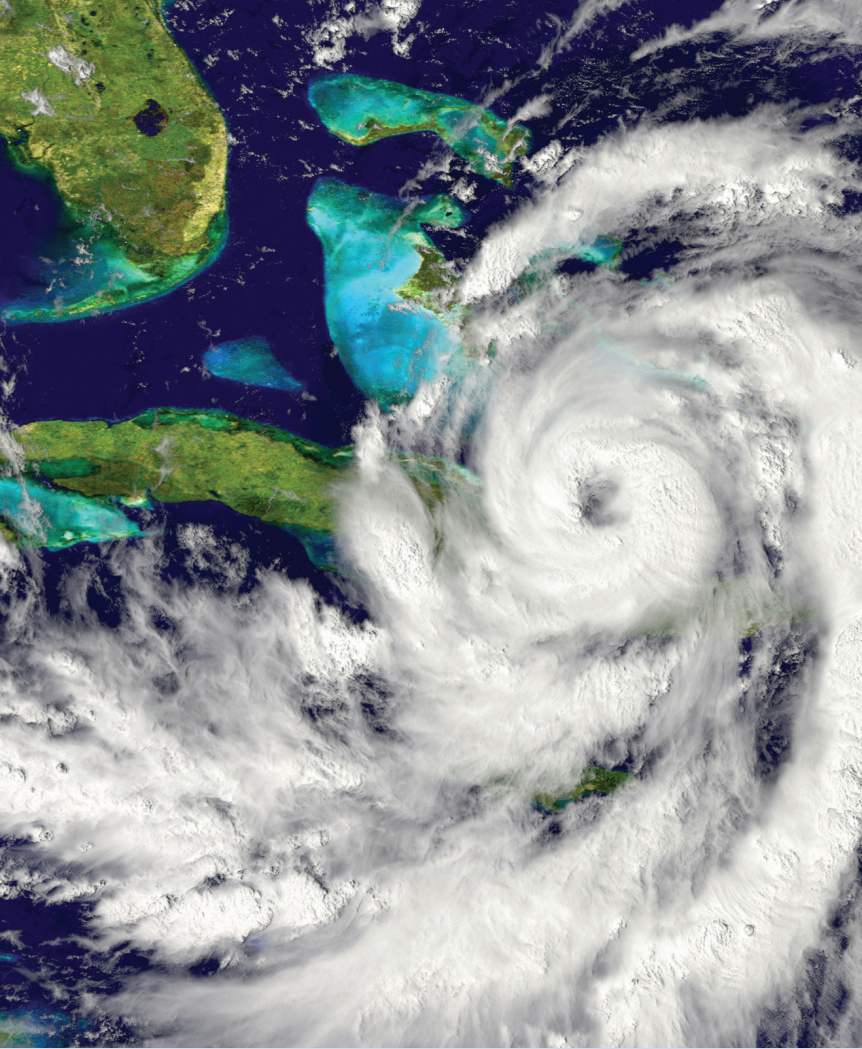

The International Property Division at Channel Syndicate enjoys a reputation as a strong and reliable provider of coverage to risk-managers and brokers around the globe.

The division trades with clients from over 60 countries, building and maintaining long term relationships with risk-managed large entities and single location accounts by providing bespoke insurance product needs.

Our Underwriters have developed a bed-rock of business, with a high renewal retention rate. We also support small commercial enterprises, with tailored coverages and large lead lines. In addition, we write a limited number of binder accounts, the majority of which support producers in Canada.

We offer All Risks covers as well as location-specific all risks policies. We also write DIC and Single Peril protection in regions which have experienced particular challenges. By working with brokers from around the world, post-catastrophe, this team is known for its balanced response to market-changing events.

With no exclusions outside of the Energy sector (oil & gas and power generation are not written), the team is experienced in the hospitality, high tech and communications industries. The Channel team are also leaders in municipality, food processing, logistics and transportation accounts.
