Your top priority is running and growing your business.

We're here to help protect it.

New cyber security trends are constantly emerging. While common threats like ransomware attacks, phishing scams and banking trojans aren't new trends, they are becoming more sophisticated and widespread.

It's not just large enterprises that are vulnerable. Small and mid-sized companies use computers and portable devices, store electronic data, retain people's private information and are dependent on the internet – but may not have internal expertise to prevent, manage or recover from cyber attacks.

Cyber Coverage provides multiple layers of insurance defense:

- **Data Compromise Response Expenses**
Provides you with the resources to respond to a personal information breach
- **Computer Attack**
Pays for restoration if an attack damages your data and systems
- **Cyber Extortion**
Helps you respond to extortion threats
- **Data Compromise Liability**
Covers costs associated with lawsuits related to personal information breaches
- **Network Security Liability**
Provides defense and settlement costs if a system security failure on your part causes damage to a third party
- **Electronic Media Liability**
Provides defense and settlement costs if the information on your website causes damage to a third party
- **Identity Recovery**
Provides case management service and out-of-pocket expenses to recover control of your identity after an identity theft
