

Starr Insurance supports our client's construction loss control function with a team of highly trained specialists. Our consultants are well versed in construction workers' compensation, general liability, fleet and environmental requirements and our services are designed to reduce exposures, control losses and positively impact performance. Our approach begins during the preconstruction phase by identifying primary risks and developing plans and strategies to reduce these exposures. We are capable of delivering products and services that can be customized to specific construction projects and operations.

Loss Control Services and Products

Jobsite Safety and Liability Surveys

- Service consists of conducting periodic surveys of jobsites to assess exposures and recommend control measures
- Frequency and duration of jobsite surveys will vary by project type, size and construction phase

Claims Trend Analysis

- Should claims develop we endeavor to analyze them to reveal loss trends and, once identified, design services that target these specific exposures to facilitate risk improvement

Accident Investigations

- Highly trained consultants are available to assist with accident investigations

Contractor Safety, Health and Risk Management Program Evaluation

- Put our experience to work with an overall risk management program evaluation. We can provide valuable guidance in assessing whether a program is designed to meet workers' compensation, liability, fleet and environmental requirements associated with business operations

Fleet Safety Program Services

- Services are available to properly manage commercial fleet operations
- Services include fleet safety program evaluations, motor vehicle records analysis, driver training systems and telematic fleet risk management solutions

Industrial Hygiene & Ergonomics

- From repetitive strains to occupational health exposures to PPE requirements we provide testing and solutions related to construction operations and requirements

Environmental Assessment and Compliance Services

- Our specialists provide environmental program consulting, site assessments, remediation services, environmental awareness and regulatory training and regulatory compliance assessments and support

Loss Control Services and Products (cont'd)

Construction Training Requirements

- OSHA certified 10-hour and 30-hour trainers and focused training programs to address specific operations

Accident & Illness Prevention Training

- We are capable of delivering tailored training programs to meet the specific needs of our clients
- Training resources include on-site training, videos, toolbox talks, online training, compliance posters and safety manuals
