

STARR

ENVIRONMENTAL LOSS CONTROL SERVICES

Starr's team of dedicated specialists in site pollution, workers' compensation, general liability, and fleet safety work with clients to identify key risks and develop tailored strategies to reduce exposures, control losses, and improve your business's performance.

Loss Analysis

A primary tool in the development of a service strategy for initial loss control solution efforts. Loss analyses are utilized to provide insight into trends by loss type, occupation, department and location. Onsite fact-finding can then be used to verify causation leading to data driven decision making regarding possible solutions.

Accident Investigation

Accident investigation education to help our customers better evaluate the fact-finding accident investigation and reporting processes to ensure proper root cause analysis and corrective action accountability.

Health and Safety Program Assessments

An overall risk management program evaluation to include standard operating procedure reviews. Provide valuable guidance in assessing whether a program is designed to meet environmental, site pollution, workers' compensation, liability and fleet requirements associated with business operations.

Contractor Safety Accountability

One of the best ways to ensure that a site runs safely is to select contractors that can complete the agreed upon work in accordance with the contractual obligations. Subcontractor safety performance is influenced by the owners' ability to manage and coordinate project activities and their ability to quickly establish a safety culture.

Loss Source Focused Supervisory Forums

Provide management personnel with employee, driver and/or public liability hazard recognition skill training to be effective in meeting their safety responsibilities based on loss performance.

Slip, Trips and Fall Assessments

Identify risk factors contributing to same level and elevation slip and fall hazard as well as methods to minimize employee and public liability exposures. Pre-planning, policy and procedure reviews, housekeeping, access assessments to help make an educated decision concerning footwear changes, cleaning chemicals or changes to flooring materials.

Ergonomic Evaluations

Musculoskeletal Work Design Assessments to observe how materials are lifted, lowered, pushed, pulled and carried. Assessing these activities and behaviors helps determine options to limit strain injuries to the lower back, shoulder and other body parts.

Fleet Safety Evaluations and Coaching

Evaluation programs focused on standard operating procedures, telematics and technology, driver qualification programs, policy enforcement, crash investigations, maintenance and personal use exposures. Decision based coaching programs that stress backing, hitting others in rear and sideswipe prevention techniques for regulated, straight trucks and scattered sales fleet exposures.

Specialist Services

Technical areas such as Sustainability, Hazardous Materials, Emergency Response, Remediation Technologies, Industrial Hygiene, Indoor Air Quality, Quality Control and Product Liability, Risk Transfer, Leak Detection, Personal Protective Equipment, Waste and Contamination Management, Process Safety Management and Self-Inspection Programs.

Industry Insights and Technology

Sharing best practices, emerging hazard trends, crisis management, as well as advanced technology solutions to assist alongside our consulting expertise.

Virtual Loss Control

On-demand consultations, and streaming options critical for educating managers and employees in workplace safety, hazard management and avoidance. Virtual solutions also include Compliance Training Offerings, Learning Management System and Custom Video Production Services. Starr has access to a wide variety of safety educational forums and videos that can be utilized by your supervisors at any location.
